Description

Thanks to its large storage volume, the XL-BOXX ADR is excellent for the transport of machines and tools. Battery-operated cordless tools are now widely used as electrical hand-held power tools. The XL-BOXX ADR is therefore approved as a transport container for the transport of dangerous goods in accordance with the ADR, RID, IMDG Code, UN Recommendations on the Transport of Dangerous Goods, ICAO-TI and IATA-DGR. However, the approval only applies when used in conjunction with the lid insert supplied and a specified foam insert. This can be quickly and simply selected through our *my*Sortimo inlay service and individually adapted to the goods you need to transport. The maximum usable internal dimensions are 525 x 302 x 109 mm³ and the gross weight of the XL-BOXX may not exceed 12.6 kg (≈ 9 kg load).

The concept of the Sortimo Ecosystem is also a top priority with the XL-BOXX. This is particularly evident due to its compatibility with other BOXXes. The entire L-BOXX family can be connected to the XL-BOXX and efficiently transported together. This is possible with Sortimo BOXXes as well as with our partner Hilti's size 20 cases.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 10.09.2024
