Description

The L-BOXX long thermal divider can be used to subdivide the depth of L-BOXXes 238 G and L-BOXXes 374 G fitted with a thermal insert. The divider can be inserted into the slots provided in the thermal insert. The interior width of the L-BOXX can be subdivided creating smaller compartments in conjunction with transverse dividers. The resulting compartments are ideal for the storage of cartridges that have to be transported upright.
