#### Description

The slot divider 288x60 mm, used in conjunction with a divider frame, divides the width of the L-BOXX 102 G4. This simply involves inserting the plastic adapters supplied into any slots in the divider frame and then re-inserting the slot divider.

The slot divider also has slots, providing additional depth division options in conjunction with a divider 173x60 mm. The resulting compartments create more order within the L-BOXX and a structured working day.
