- Quick and easy assembly

Materials & Colour

Material(s):	Steel
Color:	Black

Dimensions

External dimensions:	96 x 96 x 50 mm

Technical details

Weight:	2,69 kg

Description

The product includes two locks and three matching keys.

The UFO³ Smart Duo can be mounted on rear or side sliding doors and ensures burglar resistance thanks to both its shape and the materials used. The spherical cap fits perfectly to the car body and leaves no room to insert tools to pry open the doors. This means the UFO³ Smart Duo secures your vehicle against drilling and tampering attempts.

If needed, the lock can be used as a slamlock or deadlock option. Explanation:

- Slamlock: The security lock automatically locks when the door is closed.
- Deadlock: The safety lock only locks when it is manually locked with the key. This is particularly suitable if the load only needs to be protected at certain times or in certain places during the working day.

If the lock automatically locks while you are still in the vehicle, the UFO³ allows you to open the doors from the cargo area. In addition, the lock is tested according to the EN 12320 standard and has achieved the maximum security level (grade 6) in all durability, resistance and security tests.

It takes around 80 minutes to fit it to the door. The installation kit with template for the holes through the car body is included.
