Baseframe LED strip fixing rail SP 1510

Material no.: 1000022255 | Matchcode: UB LED-S FSSP 1510 | EAN code: 4014599583918

» For LED strips with restraint pole fixing rail

» Space for two 1.5-metre long LED strips

» Protects LED strips and reduces glare

Materials & Colour	
Material:	Aluminium
Colour:	Sortimo CoolGrey

Dimensions	
External dimensions:	1.510 x 72,4 x 8 mm

Technical details	
Weight:	0,40 kg

Description

The LED strip support is ideal for the optimum attachment of LED strips, at the same time as using a fixing rail for restraint poles. The support rail is mounted between the restraint pole fixing rail and the roof beam. It is fixed in place using the mounting material for the fixing rail. The hole pattern is already punched in the support rail. One 1.5-metre long LED strip can be fitted on each side of the rail. The edge of the support rail protects the LED strips from damage, at the same time preventing a direct view into the LED light, reducing unpleasant glare.
