Description

The hook made of sturdy, glass fibre reinforced plastic is designed specifically to fit the slotted holes of the aluminium side panel of the van racking system. The hook clamps automatically into the punched out holes of the Sortimo aluminium side panel and can be simply mounted or rather demounted with one hand - without any tools. The single hook for tools 40 perforated side panel was specifically developed for the dynamic load in a vehicle and has a hook length of approx. 25 mm. As a result, you can hang up various tools and supplies for work or jackets onto the aluminium side panel of the van racking system, which on the one hand has the benefit that these are tidied away quickly but on the other hand, are quickly accessible without even having to enter the vehicle.
