Water canister set 6 litres

Material no.: 80779205 | Matchcode: ZWA 6 | EAN code: 4014599779205

Description

The 3-part water canister set consists of a wide necked canister with a capacity of 6 litres, a holder and an outlet tap. Transport liquids securely and cleanly with the water canister set. The combination of a canister with a screw cap and precisely fitting holder prevents liquids from leaking and the container tipping over when on the move. The outlet tap enabled liquids to be refilled with ease without the need to remove the canister. It means that you always have a supply of water, cleaning agents or other liquids when on the road and at your workplace.

This set for GL4 is also available with an 11-litre wide necked canister (Ref. No. 80779199). The PVC hose is not included with delivery, but can be ordered separately (Ref. No. 80779212).
