Telescopic ladder 3.0 m

Material no.: 6000012526 | Matchcode: ZTL30 | EAN code: 4045294807993

Description

The 3.0-metre telescopic ladder is made of anodised tubes and fibreglass-reinforced plastic elements. Rubber feet provide for maximum grip on the ground.

Thanks to its compact dimensions, the ladder is easy to transport, ideal for confined spaces and even fits into the boot of a car. There is a bracket (Ref. No. 80779281) available for the telescopic ladder, which enables it to be simply fastened onto the van racking system or rear door.

The telescopic ladder is small to transport but comes out big in operation. The ladder has 9 rungs and can be fully extended to a length of 2885 mm. As a result you can reach a maximum working height of 3.8 m with a load-bearing capacity of up to 150 kg. When retracted, it has a compact length of just 0.76 m.
