Side vent small

Material no.: 1000014497 | Matchcode: SELK | EAN code: 4045294827892

Description

The side vent, made of UV-resistant, weather-resistant and impact-resistant plastic, is intended for assembly on the side wall of the vehicle. Due to its compact design, the side vent projects only approx. 48 mm on the outside and, when wall cladding is fitted in the interior, can be sealed by the ventilation grille provided. Combined with a floor or roof vent, the side vent ensures the constant circulation of fresh air, meeting the gas transport requirements of the German Social Accident Insurance Association (DGUV).

The mounting material is included in the scope of delivery.
