Description

The divider 137x255 mm subdivides the width of an L-BOXX 374 G.

The divider, used in conjunction with a divider frame and a slot divider 354x255 mm, divides the width of the L-BOXX 374 G – the slot divider also subdivides the depth of the BOXX in this case. To do so, simply insert the plastic adapter supplied into any recesses in the divider frame or slot divider and then insert the divider.

The resulting compartments provide for greater organisation within the L-BOXX and help you towards a structured working day.
