Description

The ProSafe Universal hook serves the quick and simple positioning of the most varied payloads in the loading space because it boasts three stowage levels. In the upper largest hook you can lay pipes optimally or hang ladders. In the recesses underneath you can push in thinner pipes and bars quickly and stow them. The small hook on the lowest level provides you furthermore with the possibility to hang clothes or bags.

The Universal hook is hooked-in to the ProSafe uprights of the Globelyst or Sorimo HD van racking system and thereby creates extra stowage room for bulky transported goods. It is a particularly practical device because it provides an economical order and organisational solution which is simple to operate and saves you a lot of time during loading and unloading of your vehicle.
