Description

The ProClick Battery Holder lets you carry a spare battery on you. This involves hanging it on the ProClick Holder on the tool belt for ease of transport. It is always within easy reach, even when working overhead up a ladder. It can, of course, be combined with all ProClick products, from the tool carrier or C-BOXX right through to the side profile with the ProSafe hole pattern of the SR5 van racking system. The spare battery is always in its designated place and is always ready for use.

The holder is compatible with all 18 V batteries from the AMPShare Alliance (powered by Bosch Professional) and the CAS system (Cordless Alliance System).
